These are both good opportunities for conservative users and for those who like to "finish" the software of gadgets to a more advanced level. Configuring Xiaomi Router 3 The configuration of Xiaomi Mi routers is simplified: Router 3 is almost no different from the Mini model. A solid blue will appear after a few moments. 4.19. Xiaomi Mi WiFi Router 3 (2 100Mbps non gigabit LAN ports) 2. LAN Cable 3. Step: 7 Write down the address of the gateway and DNS server - they will help in changing the settings, for example, if you change the tariff or renegotiate the contract in case of moving. Step: 1 Go to 192.168.31.1 or miwifi.com and login. 3.5 Replace the code in the below url and visit that url `url_stok=/api/xqnetwork/set_wifi_ap?ssid=Xiaomi&encryption=NONE&channel=1%3Bsed%20%2D%20%22%3A%3A%2F%20%2C%20%2E%2A%2C%3B%20then%5Cn%2E%2Areturn%200%5Cn%2E%2A%2F%20%23%2B%20x%22%20%2Fetc%2Fmit.d%2Fdropbear` 3.8. You will probably disconnect again. Among of them, PandoraBox and X-Wrt work very well in Xiaomi Mi Router 3. Connecting to an Xiaomi 3 router from a PC or laptop First, the router creates an open network Xiaomi. Download x-wrt - ramips-mt7620-xiaomi_miwifi-r3-squashfs-breed-factory.bin file from here 4.16. Save and apply (middle button at the very bottom) For X-Wrt (if you are already on PandoraBox firmware and want to upgrade to X-Wrt, jump to step 4.15) 4.12. Now hold the reset button and power it up until the yellow led starts flashing. There are several OpenWrt based firmwares for Xiaomi Mi Router 3. I will suggest you to take your time and read this support forum from the beginning. Issue the below commands: `cd /extdisks/sda1 mtd write x-wrt-----ramips-mt7620-xiaomi_miwifi-r3-squashfs-breed-factory.bin` firmware reboot Now follow 4.13 & 4.14 If it doesn't work (blinking orange on boot): 4.18. 4.9. Access the PandoraBox OpenWrt admin page by going , default password is "admin". 3.9. Replace the code in below url and visit that url `url_stok=/api/xqnetwork/set_wifi_ap?ssid=Xiaomi&encryption=NONE&channel=1%3B%2Fetc%2Fmit.d%2Fdropbear%20start` 3.10. I've bricked my router many times in order to find the right steps :p Some basic knowledge of Linux commands and SSH are necessary. Now wait until the led turns into blue 4.6. Power off the router (disconnect the power cable) and then hold the reset button then power up the router, release the reset button after 2/3 seconds after powering up. Now configure internet connectivity. Your router will work as a low powered Seedbox. Connect your router through LAN cable. Upload `x-wrt-----ramips-mt7620-xiaomi_miwifi-r3-squashfs-breed-factory.bin` file and flash. You will get full power of Linux in your home router. Look at the url bar. Step: 2 Assign a Wi-Fi network name and password to the router (and to its wireless network). Select language "Chinese" to "auto" 4.11. Step: 6 Go to "Internet" and test (if necessary) the speed by clicking "Test (more)". 4.8. Now go to (while connected with LAN), you will see a PandoraBox firmware upgrade page. This is my favorite use case as I can reduce the lag while gaming by properly configuring the QoS. BUT replace OLD PASSWORD with your admin panel password (that you provided in step 3.2) and NEW PASSWORD with your desire password `url_stok=/api/xqsystem/set_name_password?oldPw=OLD_PASSWORD&newPw=NEW_PASSWORD` Step 4: Entering into SSH and flash firmwares: 4.0. Before continuing the firmware installation, let's see what OpenWrt offers beside the default Xiaomi's Chinese firmware: Supports ALL kinds of popular VPN protocols. Enough time 5. Reconnect and follow 3.3 and 3.4 steps. Brain/common sense Step 1: Downgrading the official Xiaomi firmware to dev build 1.1. First, assuming that you are using official Xiaomi firmware. You need to have absolute patience and troubleshooting capability in order to configure it like the way you want. Wait for the router to update the firmware. You can run a web server, a proxy server, IRC server and more! Using QoS (quality of service) which handles the packets travelling through your router. It also supports latest software packages from OpenWrt repository. The information about the Internet connection is displayed. Means Mi Router 3 might not get any latest update from PandoraBox. 3.2. Go to or and setup your router as usual. Step:4 Wait a minute or more - the router will start the Wi-Fi module and be ready to set up the Internet. Also, it is not easy to configure OpenWrt firmware. After a few minutes, visit 192.168.15.1 and login with username: root, password: admin 4.14. You will see breath style yellow led will glow 4.7. Connect your router through LAN cable. Let's begin (bricking or succeeding? Done if you come this far, congratulations! You have successfully installed OpenWrt to your Xiaomi R3 router: It holds lots of useful information regarding flashing and recovering. Monitor internet connectivity Ad blocking Print server DNSEncrypt (only possible in X-Wrt firmwares) and much much more. select your PandoraBox firmware (downloaded from step 2.1) and upload it. Step: 1 Accept the terms of the contract with Xiaomi and click "Next". Connect to it from your PC, laptop or tablet and type miwifi.com in the address bar of your browser. You can prioritize certain types of traffic with QoS. Step 2: Download firmware & preparing the flash file For PandoraBox firmware: 2.1. Download the firmware file from here 2.2. Download PandoraBox boot file from here 2.3. Put "pb-boot-xiaomi3-20180726-0d8505f.img" file (boot file) to your FAT/FAT32 formatted USB Drive For X-Wrt firmware: 2.4. Download kernel1.bin & rootfs0.bin for "Xiaomi Mi Router R3" from here 2.5. Put both files to your FAT/FAT32 formatted USB drive Step 3: Turning on SSH on Router 3.1. Connect your router through wifi with a default password. Step: 5 Select English from the Xiaomi Router 3 software settings. You can capture the network traffic by using various network tools and analyze that traffic later.
